FREQUENTLY ASKED QUESTIONS

What are arSuperMarkers?

Age-related super markers or "arSuperMarkers" is a term Nu Skin coined that describes components of body chemistry that influence how we age and that are the ultimate sources of ageing.

Does ageLOC™ Radiant Day with sunscreen provide both UVA and UVB protection?

Yes, ageLOC Radiant Day with sunscreen provides broad spectrum protection from the sun's harmful rays. Avobenzone and Octocrylene protect against UVA rays while Octisalate and Homosalate provide UVB protection.

Why isn't there a separate toner in this system?

The new ageLOC™ Gentle Cleanse & Tone product is a cleanser and toner combined, which may be a different format than other anti-ageing systems. ageLOC Gentle Cleanse & Tone gently cleanses, purifies, and hydrates skin, preparing it to receive advanced anti-ageing ingredients. The dual-action formula works gently at skin's own natural healthy pH, combining cleansing and toning into a single step, while leaving skin looking refreshed and youthful. While some systems require a separate toner step, the ageLOC™ system does not due to the unique nature of these premier anti-ageing products.
